

General

Angrist, Joshua D. & Jorn-Steffen Pischke. 2008. *Mostly Harmless Econometrics: An Empiricist's Companion*. Princeton, NJ: Princeton University Press.

- has excellent discussions of key econometric issues.
- This is very intuitive and helpful for thinking about estimation strategy.
- See <http://www.mostlyharmlesseconometrics.com/> and <http://press.princeton.edu/titles/8769.html>

Asker, John. 2008. Lecture Notes.

- <http://pages.stern.nyu.edu/~jasker/index3.html>

Belsley, D. A. , E. Kuh, & R. E. Welsch. 1980. *Regression Diagnostics: Identifying Influential Data and Sources of Collinearity*. New York, NY: John Wiley and Sons.

Campbell, Donald T. & Julian Stanley. 1963. *Experimental and Quasi-Experimental Designs for Research*. Boston: Houghton Mifflin Company.

Davidson, Russell & James G. Mackinnon. 1993. *Estimation and Inference in Econometrics*. New York: Oxford University Press.

DeGroot, Morris H. & Mark J. Schervish. 2001. *Probability and Statistics*: Addison Wesley.

Greene, William H. 2008. *Econometric Analysis*. Englewood Cliffs, NJ: Prentice Hall.

- Standard econometric text. Good introductory overview.
- the latest version is amazing in the breadth of its coverage
- it includes many examples and practical advice
- This is my deeper go-to reference
- See <http://pages.stern.nyu.edu/~wgreene/Text/econometricanalysis.htm>

Imbens, Guido & Jeffrey Woolridge. 2007. What's New In Econometrics Lecture Notes: National Bureau of Economic Research.

- <http://www.nber.org/minicourse3.html>

Johnston, John & John DiNardo. 2001. *Econometric Methods*: Irwin-McGraw Hill.

Kennedy, P. 1998. *A Guide to Econometrics*. Cambridge, MA: MIT Press.

- Less technical, but presents the material in an intuitive fashion.
- Always the book to go to first.
- This is my quick go-to reference that gives great overviews and cites
- Easy to use and read.

King, Gary, Robert Keohane, & Sidney Verba. 1994. *Designing Social Inquiry*. Princeton NJ: Princeton University Press.

- clearly makes the case that large and small n studies adhere to the same logic. Great intuitive explanations of mathematical concepts

Pakes, Ariel. 2003. Common Sense and Simplicity in Empirical Industrial Organization. *National Bureau of Economic Research Working Paper*, 10154.

Reiss, Peter & Frank A. Wolak. 2007. Structural Econometric Modeling: Rationales and Examples from Industrial Organization, *Handbook of Econometrics*: Elsevier.
- <ftp://zia.stanford.edu/pub/papers/reisswolak.pdf>

User groups for econometric software packages

Sutton, Robert I. & Barry M. Staw. 1995. What Theory Is Not. *Administrative Science Quarterly*, 40: 371-84.

Winship, Christopher & Stephen L. Morgan. 1999. The Estimation of Causal Effects from Observational Data. *Annual Review of Sociology*, 25(659-706).

Wonnacott, Ronald J. & Thomas H. Wonnacott. 1979. *Econometrics*. New York: Wiley & Sons.

Wooldridge, Jeffrey. 2002. *Econometric Analysis of Cross Section and Panel Data*. Cambridge, MA: Cambridge University Press.

- Great reference on panel models.
- Like the explicit focus on panel data and solutions to endogeneity
- More in depth, often too complex, but sections can be skipped, and there is much good intuition.
- Only decent text covering panel methods in depth.

Panel

Arellano, Manuel & Stephen Bond. 1991. Some Tests of Specification for Panel Data: Monte Carlo Evidence and an Application to Employment Equations. *Review of Economic Studies*, 58(2): 277-98.

Hsiao, Cheng. 2003. *Analysis of Panel Data*. New York: Cambridge University Press.
